

# 2016 TRUCK & TRACTOR PULL PROGRAM

**ECIPA**

EAST CENTRAL IOWA PULLERS ASSOCIATION

## *A letter from our ECIPA president...*

Welcome to ECIPA's resurgence from the dead! Not too long ago, many had written ECI off and were saying that our time was up. In the fall of 2009, the writing was on the wall to make some changes. Three classes were made that night, one fizzled out, and one was merged with the heavy hot farms to create ECI's largest current class. The Pro Farms had their own issues and were at a stagnant growth five years going so we switched from 12 to 16 mph and haven't looked back. The Super Stock 2wd & 4wd trucks both left, but the good news is that the two wheelers are back, and we are welcoming in the 7,500lb 360 Hot Stocks too!

In 2009, when they did that, I was a nobody in the world of pulling. I pulled a 7500 pound Farmall 706 fitted with a 5.9 Common Rail Cummins diesel. ECI made the 12 mph Pro Farm, and we soon found out how nice it was to pay our membership, and always have the same set rules every weekend. That summer of 2010, we hung 5000 pounds on that tractor to pull in the 12,500lb class in Manchester (two hook show made it 12,500lb). Humble beginnings were a stepping stone to where I am today, and I am thankful for them. Back then I didn't know too many pullers and didn't necessarily feel like I belonged when I showed up to pull, but by the end of the year a lot of tensions subsided. Fast forward a couple years and after a successful benefit pull; I was shoehorned in as president.

As a Pro Farm competitor, I would be considered a pauper of our association. Craig Kinzenbaw was a great vice president, as he was actually still acting as president and I was the vice president. But in 2015 he threw me to the wolves and I hit the ground running and loved every minute of it. As a one-time outsider ECIPA rookie, I know what it feels like to show up to a pull for the first time, so I try to always do my best to greet our new pullers and work with them to make improvements where they are needed in order to create a healthy environment.

Jealousy, greed and selfishness create bad morale, and unstable environments, but being transparent, honest, and genuine is what has given me all the necessary leadership tools to get this club where it is today. I will not change one bit and will continue to kiss the biggest dirt bags hiney as much as the class act's. My goal is to keep up on the knowledge of our classes so that I can see the potential changes that need to be made. It's not hard to see that a head in the sand will leave us a day late and a dollar short. Thanks for all the support in this continued effort to create the wonderland we get to pull in.

-ECIPA President

An advertisement for a 2016 Chevrolet Silverado HD. On the left, a black pickup truck is shown driving on a dirt road, pulling a flatbed trailer. The background shows a farm with a barn and trees. The Pat McGrath Chevrolet logo is in the top left corner. On the right, a blue box contains the text: 'NEW 2016 SILVERADO HD STARTING AS LOW AS \$42,900'. Below this, it says 'DURAMAX DIESEL' with a small engine icon. Further down, it lists '397 HORSEPOWER' and '765 LB/FT TORQUE'. At the bottom right of the blue box is the website 'McGRATHAUTO.COM'.
